Team 4 - Bugs are Features Too

University of Kentucky - CS 499 - Fall 2019

Customer: Ben Fox, Trissential

September 27, 2019

Author:

Michael Murray - All Sections

1. Estimated Story Points

Based on the combined estimates of all of our team members, we believe that our project is 90 story points. Story points were assigned relative to scoring the product list page as 8 points.

2. Product Size

We currently have 8 user stories of varying depth. One of these stories is an epic that is divided into 8 subsections. All of which are visible on our GitHub wiki.

There are currently 5 Acceptance Tests, each defined as successful if user interactions are able to match the 5 use cases documented in the Requirements Specification document. Further tests are planned, but are not rigorously defined.

3. Product effort

Team/Customer Meetings - 12.5 Hours (2.5 Hours each)

User Story Preparation - 4 Hours

Project Plan Preparation - 22 Hours

GitHub wiki/Develop Notebook - 2.5 Hours

Total - 41 Hours

4. Defects

We do not currently have any completed code, as such, there are no defects at this time.

5. GitHub Wiki/Develop Notebook
